EDUCATION

Senior Secondary

Takshashila Vidyapith

93

2019

B.E computer Science

Chitkara University

8.55(till 6th sem)

2026

TECHNICAL SKILLS

Programming Languages: C/C++ , Java, Python, JavaScript

Web Technologies: HTML, CSS, React.js, express, mongoDB, Node.js, MySQL

Tools: Git/Github, Linux, VS Code, Vercel, Figma, Framer

PROJECTS

Face2Face - Real-time Video Calling App

Full Stack WebRTC Project

- Developed a lightweight, real-time one-on-one video and audio calling web app using **WebRTC** for peer-to-peer communication and **Socket.io** for real-time signaling.
- Implemented custom UI with features like **mute, end, and reconnect controls**, responsive design, and secure room-based calling via unique links.
- Built the frontend using **React.js** and backend using **Node.js, Express.js**, ensuring low latency, browser compatibility, and smooth user experience.
- Designed scalable architecture for signaling and media exchange without relying on third-party SDKs, enhancing learning of browser APIs and WebRTC protocols.
- Live Demo: <https://face-to-face-frontend.vercel.app/>

DMRC map

Data Structure Project

- Developed a terminal-based Java application to find the shortest path between two metro stations using Dijkstra's algorithm and graph traversal techniques.
- Implemented features to display all intermediate stations along the shortest route, enhancing user experience and functionality
- Utilized advanced data structures like graphs and priority queues to optimize pathfinding and ensure efficient performance. Built with a focus on algorithmic problem-solving, leveraging Java for scalability and accuracy in handling large datasets.

Appointment Scheduler

Full Stack Development Project

- Designed and developed a user-friendly web application for doctors and patients to streamline appointment scheduling, incorporating secure authentication for role-based access.
- Built a dynamic scheduling system that allowed patients to book appointments based on real-time doctor availability and empowered doctors to approve or reject requests efficiently.
- Enhanced user experience by implementing an intuitive dashboard for doctors to manage their schedules and for patients to track and manage their appointments seamlessly.
- Utilized Tech Stack [JavaScript, Node.js, Express.js, React, MongoDB, Tailwind css]

Minor Projects: Fitness tracker, ComPost

ACHIEVEMENTS

- Top-60 Abhivyakti 2022
- Got selected in top 160 students (URA-2024)

MISCELLANEOUS

- **Certifications:** Cloud Computing Foundations, Introduction to DevOps, Microsoft Certified: Azure Fundamentals
- **400+ DSA Problems:** I have done 400+ DSA problems on platforms like LeetCode, Coding Ninjas, etc.
- **Fluent in:** English, Hindi, Punjabi, Maithili
